Please reject the NAB's petition 04-160. I am an XM subscriber. I am one of its greatest proponents and spread its greatness via word of mouth. In 2000 the big Cirrus conglomerate took off the only radio station I listened to without complaint. It was contemporary Christian. The only other Christian station was talk and Gospel. Not my brand. XM provides options my local stations don't provide. I don't have to worry about what my children hear on the ride to school.

I would appreciate traffic reports and weather reports via XM especially if I were traveling. I wouldn't have to spin my dial through questionable stations hoping not to hear something offensive. At home I may know. In Dallas, Indianapolis, OKC, or Santa Fe, I won't. I don't need to accidentally come across shock radio. I want to get an email from XM telling which channel to turn to.

Don't allow the lobbyist to sway you.

Sincerely,
Tami Kraft
